

HELP US TO STOP RESISTANT BACTERIA!

When bacteria become resistant to antibiotics, treating bacterial infections becomes increasingly challenging.

Antibiotic resistance can affect anyone,
but we can all do something about it.

What can YOU do?
Use antibiotics the right way.

- ✔ Use only antibiotics when prescribed by a health professional
- ✔ Do not demand antibiotics if your healthcare professional says you do not need them
- ✔ Follow always your health worker's advice when using antibiotics
- ✔ Do not stop antibiotic treatment halfway
- ✔ Never share or use leftover antibiotics
Take them back to the pharmacy

Thank you very much for your help!
We can only fight antibiotic resistance together.
